

M6 manual

1x6.5"/1x1.75" Coaxial Floor Monitor
Operating Instructions

Thank you for purchasing the Quint Audio M6 loudspeaker.

This manual contains essential information on installing and operating the product correctly and safely. It is necessary to read this manual carefully in order to become familiar with these procedures.

Keep the manual for future use. This manual forms an integral part of the product. Reselling of the product is only possible if the user manual is available. Any changes made to the product must be documented in writing and passed on to the buyer in the event of resale.

As part of a continuous evolution of techniques and standards, Quint Audio BV reserves the right to change the specifications of the product and the content of this manual without prior notice. Please check the Quint Audio BV web site at www.quintaudio.com on a regular basis for any updates.

Should the product require repair or should information about the warranty be needed, please contact an approved Quint Audio BV distributor. The address of the nearest distributor is available on the Quint Audio BV web site.

Unpacking

Carefully open the shipping carton and check the product for any noticeable damage.

Each Quint Audio BV product is tested and inspected before leaving the factory and should arrive in perfect condition. If found to be damaged, notify the shipping company or the distributor immediately.

Only the consignee may initiate a claim with the carrier for damage incurred during shipping. Be sure to save the carton and packing materials for the carrier's inspection.

Safety Warnings in this manual

This refers to potentially dangerous situations or dangerous forces that may lead to personal injury.

This refers to a potentially dangerous situation which may lead to damage to the equipment.

This refers to a situation which may cause the equipment to malfunction.

Read this manual carefully before using the product.

- Read all safety instructions, warnings and instructions concerning this product.
- Make sure you fully understand the safety issues mentioned.
- Read all cautions present on the product itself.
- Read all the related product information before using the system.
- Work with qualified personnel only.
- Rigging, hoisting and flying pro audio equipment is never free of potential hazards. You cannot rule out human error while gravity, wind and electrical forces do their regular job. Therefore: Always use your common sense!

**Personal safety**

Ensure health and safety during installation and setup. In order to prevent accidents when deploying loudspeakers on the ground or when flown, please take note of the following:

- The system may not be used for other purposes than it is meant for.
- All system components must be inspected before use, in order to detect any possible defects.
- Take into account the wind effects on dynamic load. If the wind force exceeds 6 Beaufort scale, lower down and/or secure the loudspeaker.
- Be cautious when flying a loudspeaker. Always verify that no one is standing underneath the loudspeaker array when it is being raised or lowered.
- Do not place the product on an unstable cart, stand, tripod, bracket, or table. The product may fall and be seriously damaged and may cause serious human injury.
- Never stand in the immediate vicinity of loudspeakers driven at a high SPL level. Professional loudspeaker systems are capable of causing a sound pressure level that is harmful to human hearing. Seemingly non-critical sound levels (from approx. 95 dB SPL) can cause hearing damage if people are exposed to it over a long period of time.
- Loudspeakers and amplifiers work with potentially harmful voltages. Avoid any direct contact with the human body. Respect electrical safety warnings at all times.
- Use certified connectors and cables. All cables must be electrically safe (according to NEN1010) and routed so that there is no direct walking on an/or driving over it nor objects are placed on top of them in any way it might damage the cable. Make sure that the cables and connectors are used stress free.

General mounting and rigging instructions

- Respect the Working Load Limit (WLL) of Quint Audio equipment at all times.
- Respect the WLL of third party equipment at all times.
- Quint Audio is not responsible for any rigging equipment and accessories provided by third party manufacturers.
- Installation should only be carried out by qualified personnel who are familiar with and have knowledge of the rigging techniques used and with the safety recommendations stated in this and other eventually related manuals.

Conditions which require immediate service

In all cases, when after an event risk of unsafe operation of the device, such as:

- After the damaged hitting any casing or cable.
- After a fall from the product resulting in visible or invisible damage.
- After mishaps and/or misuse and or possible visible or invisible deformation of any rigging system, rigging part or rigging accessory.
- After noticing a change in the operation of the device.
- After the product has been exposed to rain or moisture.
- After the product has been exposed to foreign objects or liquids.

Magnetic field

Loudspeakers produce a static magnetic field even if they are not connected or are not in use. Therefore make sure when managing and transporting loudspeakers, they are nowhere near equipment and objects which may be impaired or damaged by their external magnetic field. Generally speaking, a distance of 0.5 m (1.5 ft) from magnetic data carriers (floppy disks, audio and video tapes, bank cards, etc.) is sufficient; a distance of more than 1 m (3 ft) may be necessary with computer and video monitors.

Product monitoring, care and maintenance

- Regularly check all load bearing bolts and other metal parts in the mounting devices. Any parts showing any sign of (suspected) defect must immediately be put aside and withdrawn from use to be inspected by qualified service personnel.
- Regularly check the loudspeaker housings and accessories for visible signs of wear and tear, and replace them when necessary.
- Keep the loudspeakers away from heat producing sources such as heaters, stoves, fireworks etc. etc.
- Keep the loudspeakers away from water; prevent the possibility of water and moisture entering it.
- Even if the product is weather-resistant, it should not be exposed to moisture (rain, sea spray, shower, steam) for a long period of time, nor put in direct contact or immersed in water.
- Prevent objects and/or any liquid to enter the device.
- The loudspeaker housings can be cleaned with a damp cloth. Do not use aggressive cleaning agents or solvents as they can damage the protective layers.
- Small damages can be repaired with a water-based paint such as Warnex textured paint. The base layer however is an environmentally friendly polyurea. Damage to this layer can be repaired with polyurea, but this must be done by the manufacturer or a certified Quint Audio service point.
- The user should not carry out any work or maintenance on the system other than those mentioned in the manufacturers instructions. Technical service must be carried out by authorised technical personnel only.

M6

high performance mini monitor

Design

The Quint Audio M6 is a 1x6.5"/1x1.75" closed cabinet horn loaded 2-way passively filtered coaxial loudspeaker system for monitoring and fill purposes. The horn consists of a unique coaxial woofer/horn/driver combination where the woofer injects its energy through a precisely defined pattern of holes in the horn itself.

The cabinet is built of birch plywood and equipped with a wear-, tear- and impact-resistant hybrid coating.

The M6 features several rigging points that facilitate both horizontal and vertical mounting. It also features an ergonomic handle on the back of the cabinet.

The front is finished by a coated steel grille and covered with an acoustically transparent layer.

MODEL	M6
type	6.5"/1.75" Coaxial
filter	passive
power handling	200W
program power	400W
impedance	16 Ohms
sensitivity	95 dB 1W 1m
program SPL	118 dB 1m
frequency range	90-20000Hz
dispersion	80° nominal
weight	7 kg
size (wxhxd)	220x190x210mm

Application

The Quint Audio M6 is a very compact 6"/1" coaxial high-tech mini monitor with an extraordinary constant directivity of 80 degrees conical over the entire mid and high frequency spectrum.

The M6 therefore is not only particularly suitable as ultra compact near field stage monitor but also as a small fill that can be deployed in many electro acoustic situations and solutions. In fact every-where a sound engineer needs uniform, controlled dispersion in a near-field PA application the M6 is the ultimate problem solver.

By design the M6 provides soft and rounded shapes which makes this small loudspeaker very suitable for television, live theater and fixed installations. As a monitor, the M6 can be placed at an angle of both 30 (monitor) and 60 degrees (side fill).

This speaker also has various SpeakOn4 connection points and a conical rigging adapter with which it can be mounted and aligned on many types of brackets. Als a built-in grip on the back of the loudspeaker is provided.

The M6 has a very neutral sound and features an extraordinary even soundfield which makes it an ideal micro-hybrid loudspeaker for both vocals and music.

Connectors and internal wiring of the loudspeaker

There are 2 connectoin panels on the M6, one on each side. One panel is fitted with a pair of Neutrik Speakon NL4 connectors and one holds on Speakon link connector. All pins of both connectors are wired in parallel internally.

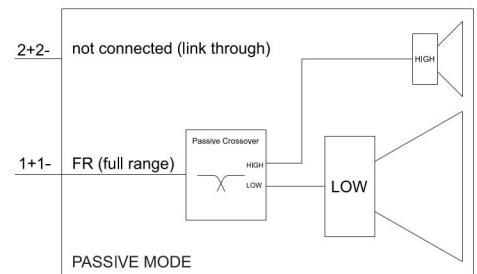

Pin assignments are stated on the each panel (layouts below). Pins 1+2+ are used for full range passive mode. Pins2+2- are linked internally.

The M6 may only be used in combination with a Quint Audio processor / amplifier

Internal wiring of the loudspeaker

The M6 is passively filtered internally.

Accessories

M6-bracket

M6 bracket rotatable over 2 axes

SM-1

Universal stand mount 38mm

Warranty

Quint Audio BV warrants the original purchaser and any subsequent owner of each new Quint Audio BV product, for a period of 5 years limited from the date of the original purchase by the original purchaser that the new Quint Audio BV product is free of defects in materials and workmanship.

Quint Audio BV warrants the new product regardless of the reason for failure, except as excluded in this warranty. In order to obtain warranty, you must keep the original sales receipt to establish the exact date of purchase.

Warranty does not cover any product which has been damaged because of any misuse, accident, or negligence. Warranty does not cover any product which has been damaged because of use or connecting Quint Audio products to third party products or by not using Quint Audio amplifiers and/or Quint Audio controllers with the proper settings, neither due to accident, or negligence. Warranty also does not extend to a new Quint Audio BV product if the serial number has been defaced, altered or removed.

Quint Audio BV will replace defective parts and repair malfunctioning products, regardless of the reason for failure (except as excluded). Warranty work can only be performed at our authorized service centres, or at our factory.

Disclaimer

Quint Audio BV is not liable for any damage to loudspeakers, amplifiers, or any other equipment that is caused by negligence, misuse or improper installation.

Quint Audio BV is not liable for any incidental damages resulting from any defect in the new Quint Audio BV product. This includes any damage to another product or products resulting from such a defect.

The information contained in this manual has been carefully checked for accuracy, at the time of going to press, however no guarantee is given with respect to the correctness.

Quint Audio BV bv accepts no responsibility for any errors or inaccuracies that may appear in this manual or the products and software described in it.

Technical specifications, dimensions, weights and properties do not represent guaranteed qualities.

Quint Audio BV reserves the right to change specifications without notice.

years limited warranty

EC declaration of conformity

This declaration applies to the product Quint Audio model M6. All product variants are included, provided they correspond to the original technical version and have not been subject to any later design or electro-mechanical modifications.

We, Quint Audio BV herewith declare that said products are in conformity with the provisions of the following EC directives including all applicable amendments.

States that the following products:

The M6 system is in conformity with the provisions of the following EC directives and applicable amendments:

Machinery 2006/42/EC and the national laws to enforce this directive, National standards and technical specifications applied: DIN EN ISO 12 100, DIN EN 1050, BGV C1 provided the mounting components are unaltered/modified and in "factory-original" condition.

Established at Wintelre, the Netherlands Aug 1th, 2018 A detailed declaration is available on request and can be ordered from Quint Audio BV.

WEEE Declaration (Disposal)

Electrical and electronic equipment must be disposed of separately from normal waste at the end of its operational lifetime.

Please dispose of this product according to the respective national regulations or contractual agreements. If there are any further questions concerning the disposal of this product please contact Quint Audio BV.
